| Was using a free version of AVG antivirus and it was  
| telling me i had the following virus: C:WINDOWS\system32  
| \msconfd.dll Trojan startpage.CE

| Ive since erased that antivirus eqpt and installed  
| AntiTrojan(i think it was called) and a number of  
| others.Ive just used "Stinger" and "FProtAntivirus".None  
| of these are reporting the virus,they are giving it the  
| all clear.

| Does anyone know how i can erase C:WINDOWS\system32  
| \msconfd.dll as im unsure that Trojan startpage.CE has  
| been erased.The main problem it was causing was that it  
| was taking many attempts to start up windows XP,and was  
| then getting a message saying "The system has recovered  
| from a serious error".

| Just trying to get things running smoothly,im new to pcs  
| so wld appreciate some idiot proof advice!

| Cheers.Email me as above plz!!Thanks!!!
