As of today, when I go to an Xbox.com page and sign in using my .NET Passport account (as I have for many months now), I am not allowed access and given the following message:

"Due to your age, you cannot sign up for an Xbox.com account. Xbox.com accounts are for users 13 years of age or older.

Click here to return to the homepage."

And elsewhere on this page, it does say that I am "signed in as: *****" and lists my "Gamertag" accurately as it always has. My date of birth is still accurately reflected when I go to .NET Passport Member Services to view my account info. I can sign in normally in MSM Messenger, etc., etc. and anything else requiring a .NET Passport. This has been going on all day. I would post for help in the Xbox.com Technical Issues Forum, but I must first be allowed access via my .NET Passport of course... lol. I have spoken with friends who are not having this issue today, so it seems Xbox.com itself is "OK".

Help anyone?

Help?
