Tammy,

Glad to hear that you've removed most of your scumware.

You really should've replied to your original thread. If you need to more help, please reply to \*this\* thread. It makes it easier to find. That said.

eghtmldialer.dll is the dll file that would need to be unregistered. Do you still have eghtmldialer.dll?? Can it be deleted??  
<http://sarc.com/avcenter/venc/data/adware.instantaccess.html>

Also look at the instructions at this link.  
<http://www.kephyr.com/spywarescanner/library/instantaccessdialer/index.phtml>

Problems uninstalling? Here's some advice.  
<http://www.kephyr.com/spywarescanner/uninstallproblems.phtml>

If these keys do not exist, that's good.

```
HKEY_CLASSES_ROOT
egdhtml.egdialhtml
egdhtml.egdialhtml.1
egdialobject.egdial
eghtmldialer.htmldialer
eghtmldialer.htmldialer.1
```

```
HKEY_CURRENT_USER\Software
egroup
egdhtml
```

--

Hope this helps. Let us know.

Wes
