I am using Windows XP Pro. Each member of my family has their own login profile set up on this machine. We all have administrator rights. However, I just went to select 'internet options' on my IE web browser and I recieved a message "RESTRICTIONS – This operation has been cancelled due to restrictions in effect on this computer. Please contact your system administrator." Since I am DAD, that would be me. My kids and wife do not get this error message. Can anyone walk me through or give me an idea on how to alter this setting. We cant figure out how this happened in the first place.

Your responses would be greatly appreciated
