```
| This PC has two users each with their own password to  
| access windows and their programs  
| My wife (bless her) can't remember how she entered her  
| password and we have not been able to get into her "my  
| documents" for almost a month.  
| We desparately need a way to either by-pass the password  
| page or to find a way the PC can tell us how it was  
| written. I can still log-on under my password and can  
| access the "my documents" by opening the hard drive...but  
| we still can't open my wife's "my documents" without her  
| password. Any suggestions would be gratefully received as  
| she needs some very important files at present locked  
| within her set-up
```
