Try running System File Checker to see if it can replace any corrupt system files.

>From Windows pop your Windows XP into the drive and close the screen that opens.

Go to Start->Run and type SFC /SCANNOW and click OK

Let System File Checker run. It may take 10-20 minutes and will show a blue progress bar. It won't tell you if it found anything or replaced anything. When finished remove the XP CD and reboot the computer.

| My computer crashed and I had to re-install XP Pro. After this when I tried

| to acc the Add or Remove Programs in the Control Panel, this message is displayed:

```
| An exception occurred while trying to run
| "C:\WINDOWS\system32\shell32.dll,Control_RunDLL
| "C:\WINDOWS\system32\appwiz.cpl", Add or Remove Programs"
```

| Can someone help me please??Harry
