Okay, I am trying to do the repair off the system cd-rom that comes with the computer, because Windows is messed up right now, and my System Restores don't go back far enough. When it asks me which installation I would like to repair, then it asks for the administrator's password. Well, it has been a long time since I installed Windows, and I can't remember it. Is there any place at all in my computer where I can find it, or reset it? If so, email me at alexiel\_animus@yahoo.com Thank you all.
