In Internet Explorer –

1. Tools > Internet Options > Advanced
2. Scroll down to the Security Settings.
3. Make sure that the two boxes are checked that say "Enable SSL 2" or "Enable SSL 3".

Try your secure sites.

Another thing you can try is:

Go to start/run

Type in: regsvr32 softpub.dll

Press Enter or click OK

If none of the above is the problem, then some reading is in order –

Page Cannot Be Displayed Error During SSL 3.0 Server Session Timeout

<http://support.microsoft.com/?kbid=305217>

Troubleshoot Situations Where You Cannot Complete MSN Sign-up or Connect to SSL Secured (128-Bit) Web Sites by Using Internet Explorer in Windows XP

<http://support.microsoft.com/?kbid=813444>

You Cannot Access Your MSN E-mail Account or Authenticate with a Web Site in Various Programs

How to troubleshoot problems accessing secure Web pages with IE6 SP2

<http://support.microsoft.com/default.aspx?scid=kb:en-us:870700>

After you upgrade to Microsoft Internet Explorer 6.0 Service Pack 2 (SP2) in Microsoft Windows XP SP2, some SSL-secured (128-Bit) Web pages and Web sites may not work correctly. Frequently, this behavior is caused by security changes in Windows XP SP2.
