AutoComplete (Internet Explorer):

Tools>Internet Options>Content>AutoComplete

Brings up the AutoComplete dialog box where you can make changes and clear forms and passwords.

Under A for Auto Complete for further information as required.

Clear Google Toolbar History

If you have the Google Toolbar installed, Click on Google logo to access a drop down menu. Choose the Clear Search History option.

This clears all previous searches listed in the drop down box.

To customise the Search Companion to your own individual needs, click the Change Preferences link in the Search Results Window.

– turn off auto complete.

could someone plz tell me how to get rid of all of my personal info that is auto saved on my computer? the info that i need to delete is the stuff that gets auto saved when you type in the any blank spaces. i don't want others that are using my computer to have access to this info.

thanks so much for your help.

chuckie
