| I posted this in the comp.security.firewalls group, but got smart @\$\$
| answers from people too proud to say "I dont know"... so I will post
| here...

|
| I work for a K – 12 school.

| In my opinion, we have some very fair rules and regulations regarding
| internet and computer use.

|
| We use a Sonicwall firewall, 3060, I subscribe to content fltering,
| which I love. It keeps out all the horrible junk that kids may
| accidently come across (Or purposely) and it covers our rear.

|
| Due to recent events, and some within the school, I have been ordered
| to block myspace.com.

|
| I have several other sites faculty and staff have asked me to block
| within the content filtering section of my sonicwall admin page.

Re: Kids bypassing firewall with proxy sites

|
| However, some students got smart, and searched google for proxy and
| anonymous. Thousands of results come up, allowing them to type in any
| website they like (including myspace) and surf around on it, bypassing
| my firewall.

|
| There is an option in sonicwall that says "Restrict Web Features:." and
|
| I checked "Access to HTTP Proxy Servers" But I am still able to get to
| sites via these proxy sites that should be blocked...

|
| Any advice?

|
| Thanks in advance!
