Please visit the Comprehensive Malware Removal Instructions on the Detailed Malware Removal page of my website: www.stopmalware.tk to clean your computer of all malware. Then follow up by reading through ALL of the tips on the safety tips page to prevent moderate-serious malware infection again.

P.S. David, I've linked you're multi_av tool to the appropriate website you gave and used the exact instructions that you've posted before with posts regarding your multi_av tool.

I get these attacks constantly. My virus protection repells it but then I get pop ups saying it was detected on my machine. It seems to try through windows messenger. I've tried changing my settings and not allowing windows messenger to work. I'd truely appreciate any suggestions. These pop up irritate me and I'm never sure if I have a problem or not. If there is a reply can I ask you for specific directions. I'm relatively computer illiterate!!!! What I know is as basic as it gets. Thankyou kindly, Tina
