How do I get rid of this virus?

Go through these general malware removal steps systematically –
http://www.elephantboycomputers.com/page2.html#Removing_Malware

If you do not have a current version antivirus installed (not earlier than 2005), scan first with Sysclean (information at first link below) or Dave Lipman's Multi-AV (see second and third links below). Then get, install, and update a full-featured av and do a thorough scan in Safe Mode.

http://www.elephantboycomputers.com/page2.html#TrendMicros_Sysclean
<http://www.ik-cs.com/multi-av.htm> – how to use Dave Lipman's Multi-AV
http://www.ik-cs.com/programs/virttools/Multi_AV.exe – Multi-AV download
http://pcdid.com/Multi_AV.htm – additional Multi_AV instructions

If the procedures look too complex – and there is no shame in admitting this isn't your cup of tea – take the machine to a professional computer repair shop (not your local version of BigStoreUSA).
