dear all ,

this is my question..

Is there any way to watch users activity in a LAN?

For instance i want to know when a user log in the server, when was the last time user log in and information like that..

Can this be done due to active directory or needs some other program?

Audit User Access of Files, Folders, and Printers in Windows XP –  
<http://support.microsoft.com/Default.aspx?kbid=310399>

Audit Active Directory Objects in Windows Server 2003 –  
<http://support.microsoft.com/Default.aspx?kbid=814595>

To add users or groups to the audit list – <http://tinyurl.com/lozjc>
