I checked the box in tweakUI to log on to windows without the log on box. Somehow the box get un checked and the log in box re-appears. A reply to my post minton about setting a password . So I set it in tweakUI. Now an error message comes up saying that Windows can not log on. I press the OK and windows comes up. I want to get rid of the error and the box.

Thank you;
David

Yes.

If you want a more detailed answer you need to tell us exactly what kind of password you want to delete.
