I should start this question by saying I know hardly a thing about computers, I never had any training, so please remember this when answering this question – I am unfamiliar with most terms and actions on a PC.

Tips (9) and (10) will get you started with AntiSpyware and AntiVirus. Go through the rest to learn to maintain your system without spending more and more money (unless you want to buy some of the products listed) and keep it running at its best.

<snipped – review post thread for the list>

richey-scott wrote:

Thanks, I had already uninstalled Norton, this was my second attempt, with another company! Any idea which anti virus are free? I have tried looking, but can only seem to find free trials. Thanks very much for your help!

Tips (9) and (10). Like I said – AntiVirus and AntiSpyware. (9) is AntiVirus software (Free and up) and (10) is AntiSpyware (Free and up.)
