I do not seem to have that file on laptop. I downloaded it from the MS site and had a problem with it at one time, but now I can't find it. Guess the same thing happened to Windows Desktop Search. I did find that one in the Program Files but no install in it. Thx Microsoft. Should I call MS and see what they suggest. TNX

I can't find an Icon or ? to access the Windows Defender program?
It is block some things I don't want block and I can't find out how to access it and enable those sites.....Thanks !

It should be on your Start Menu as a separate item.

You can create a desktop shortcut to "C:\Program Files\Windows Defender\MSASCui.exe"

Good luck
