I think you should try the Avira personal edition it is free for non-commercial use.

Take a look at <http://www.free-av.com/>.

Also take a look at <http://www.av-comparatives.org/> for best choice

Thanks, the AVG weakness was already known to me and i switched to ClamAV. I also suggested to them to add to their comparisons the suite of ClamAV, AdAware, and Spybot Search and Destroy (Spybot S&D). I also advocate adding AdAware and Spybot S&D and some firewall, better than the default windows firewall, such as Zone Alarm or Kerio.
