Good to hear someone is after Grades still LOL. Jokes apart. If you can locate on internet .adm file which can be imported to your default profile. This is nothing but registry file which will give GUI interface in default profile.

Do share what you have achieve that other can learn and understand. Believe me no one is going to hack LOL.

do update.

Manually when u insert CD then keep Shift press Autrun will not run . If you can trap this you might have solution .

i have gotten everything else to secure on the belarc cis screen but this

Additional Security Settings

4. Disable Autoplay from the Default Profile

ive tried the registry mods that i can find about disable autoplay and such, even the group policy editor under admin templates isnt working.

the info on their link states it does this. Disable autoplay for new users by default

how do i do this? thanks
