Ok then. Thanx for the help everyone. Thumbs up.  
I guess the joke's on me. I can't even delete them.

Now, I wonder if there are any hacking tools out there that could break that encryption...  
But I am in the wrong newsgroup for that i guess. Anyhow, thanx again.

No, you're wrong – if there were hacking tools for EFS encryption I'd tell you. It wouldn't be very good encryption if there were. Contact Elcomsoft – premier hackers – and see what they say.
