Can anyone please suggest another forum which may deal with my problem?
Thanks

When Autoupdate is enabled there are multiple DCOM errors in the event viewer.

When disabled I get the following error message

"The Automatic updates service failed to start due to the following error:

The executable program that this service is configured to run in does not implement the service"

I went to the recommended MS site, but could not understand the fix given.

Can anyone please help

Win XP Home SP2

TIA

Teriel9
