Ok, I did a scan and found 2 trojan virus's, I could not remove them. I even disabled the system restore option and still Norton will not delete or remove them. Ideas?

How do I fix my Adobe CS and other programs?

Thanks Much

"Doug Knox – [MS-MVP]" wrote:

No, that fix is specific to Task Manager being disabled. If this is affecting other programs, its possible that various folder permissions have been screwed up, as well.

ok, Also in Safemode I tried to open Adobe Photoshop and get same error.
Will
this fix in the registry fix this issue also?

Or do I have to fix this somewhere else?

Re: Admin rights gone – Help needed fast

Virus scan found nothing, and spyware scan removed some tracking cookies.

Rebooted in regular mode same issue also same in Safe mode.

Ideas?

Thanks
