Hi,

I have the same problem. Did you find a solution? I can find the file Lsass.exe but it is not possible to delete it!

Thanks,

FM

I don't have this problem. Perhaps a running program cannot be deleted. If so, then I would boot my BartPE from the CD. BartPE can surely delete anything.  
Or, I would try Knoppix. It ignores XP permissions hence it can delete anything.  
Or, perhaps the repair console can do the job.  
Another poster has suggested yet another way.

My buddy is Dell Inspron 6500, running with Home XP. My anti virus is Mc Afee when i was scan using of this anti virus there is a message prompt to me "trojan virus spayware".

Re: "c:\windows\system\lsass.exe"

Please help me because now my system getting worse  
running too much  
slow

Can't McAfee remove it?  
Did you follow the steps given by another poster?

How to remove this virus?

Please help

Thank you all guys

You did not provide more info about your  
Operating system version,  
what  
anti-virus and Firewall you have installed.  
Yes this Path is  
definitely a  
suspicious to me.

Go through these Cleaning steps:  
1... First, try to clean up your caches,  
Internet files and delete  
cookies  
by doing this:  
Click Start >> Control Panel >> Double  
click Network and Internet  
Connections >> Double click Internet  
Options.  
On the IE properties windows you will see  
these Tabs:  
General | Security | Privacy | Content |  
Connections | Programs |  
Advanced  
Under General Tab clear your History,  
Internet Files and Cookies.  
Then click on Advanced tab and scroll down  
to under the Browsing

Re: "c:\windows\system\lsass.exe"

Option:

[&] Browsing

[ ] Enable Third-Party browser extensions

(Req Rest) uncheck this

box.

Then click on Programs Tab and click

Manage Add-Ons and Disable all

non

Verified Add-Ons (You should Renable

them later one-by-one and see the

culprit and update it or remove it.

How to manage Add-Ons:

<http://support.microsoft.com/kb/883256>

Scan for malware from here:

Spybot Search & Destroy

<http://www.safer-networking.org/en/download/index.html>

Run a scan from here on-line:

<http://security.symantec.com/sscv6/default.asp?langid=ie&venid=sym>

<http://www3.ca.com/securityadvisor/virusinfo/scan.aspx>

Download Avast Cleaner (offline scanner)

from here:

<http://www.avast.com/eng/avast-virus-cleaner.html>

Lots of tools to download and disinfect your

machine (offline

scanner):

<http://www.bitdefender.co.uk/site/Downloads/browseFreeRemovalTool/>

After the scan run disk cleanup on your

drive.

2- Download the Hijackthis and send the

report to one of many

forums for analysis and troubleshooting:

<http://www.merijn.org/index.php>

When all else fails, HijackThis v1.99.1

(<http://aumha.org/downloads/hijackthis.zip>)

is the preferred tool to

use.

It will help you to both identify and remove

any hijackware/spyware.

Post

your log to

<http://aumha.net/viewforum.php?f=30>,

<http://castlecops.com/forum67.html>,

<http://forums.subratam.org/index.php?showforum=7>,

or other appropriate

forums for expert analysis, not here.

Any error message, have a look in the event

viewer and post them here.
