I just got my computer about a month ago..and i had 2 vunerbilities..I got rid of one on my own after getting the run around from both Tech Pc and microsoft..each was the other ones fault.I had MS)00-034 and MS01-028(this is the one I;m having the problem with W97m_goga.a) I removed the first one from downloading a patch.Now for some reason I'm unable to remove the other.I have vista basic but i downloaded Microsoft 2000..you know for the word, powerpoint etc..I did not need the lastest version..cause im only writing basic papers for school..the the scan is not erasing the problem..and according to Microsoft my updates are UTD. If anyone figures out the problem please post the link...<http://www.microsoft.com/downloads/thankyou.aspx?familyId=1e9388cc-76fa-40cf-a84a-6284f5a15533&disp> this link my help a few people out..cause that removed the (davina one..you guys where talking bout)

I have been receiving the same VBS_DAVINIA.A vulnerability warning from Trend 2007 on my Windows XP 2003. I just downloaded Trend 2008 & I'm still receiving the same warning even after repeatedly checking for Microsoft updates. Has anyone come up with a solution yet?

RE: Microsoft Vulnerabilities Scan

Hi, Dear MSFT folks,
I believe this is common problem for those who bought Trend Micro product (including myself). Is there anyway you can try it out yourself (the product) to find out this MSFT problem or simply contact Trend Micro to resolve this issue. Please let us know how to solve the problem soon.
Thanks.

Best regards,
Thomas

I am also getting these alerts. Has anyone come up with any suggestions?

Thanks,

Ari

"Lyci" wrote:

I too use
Trend
Micro
PC-Cillin
and
Windows
XP. I am
getting the
same two
alerts. I
have had no
luck in
figuring it
out. Please
let me know
if you
find
anything
helpful.

RE: Microsoft Vulnerabilities Scan

Hi
Nass,

To
answer
some
of
your
questions:

1

-

XP

Home

2-

I

have

Word

2000

and

Works

2005

3-

Cable

connection

4-

I

have

been

receiving

these

2

issues

as

warnings

for

quite

some

time

now.

Each

time,

I

went

to

Microsoft's

website

for

updates

and

thought

it

RE: Microsoft Vulnerabilities Scan

would
be
resolved.
But
they
continued
to
appear
and
I
just
dismissed
them
until
recently.
I
do
not
recall
any
particular
thing
being
done
before
receiving
these
msgs.
I
hadn't
copied
anything
from
Outlook,
etc.
5-
Pokerstars,
Camedia
Olympus
Camera
software,
HP
Officejet
Printer
software,
some
games
(that
I
don't
play)

can
do.
Regards,
nass

I have been dealing with this also. I have been in contact with Trend and they had me do several things including downloading their cleaner and the hijackthis and nothing has worked. I am still trying to resolve this and will let you know if I find a solution...if I can find this place again...lol
