Updated nightly.

> *Anyways just wanted to make an open comment. I've been checking through the logs and there have been a few .EDU downloads and quite a few coporate sites [intel, hp, kodak, oreilly, avaya, rohde-scharwz, compaq, nokia, lonza, rockwellcollins and qualcomm to name a few] that have download the text. Some of them have downloaded newer updates as I've announced them [e.g. they seem to want to see more].*

> *As it stands my current job is folding up and I'm out of work with no means to pay tuition or bills. I'm not asking for a handout or anything. However, if you are in a position to offer a student some work please email me in private. I'm very flexible about pay [in fact what I usually ask for shocks most people because its below the poverty line for most states].*

> *For people who think I have a liable mouth I have to say I have been much better at keeping IP matters private [compared to the 2001 fisasco]. For instance barely anyone knows why LibTomCrypt was pulled in early March and anyone I did tell was in the strictest of confidence [even though the terms were not under NDA anyways!].*
