Should have attached the output too with previous post.. here it goes.

The code compiles fine, but return an error for cryptPushData while decrypting. I guess I am missing something preety basic.

Here is the output:

<snip>

Testing encrypted data enveloping...

Enveloped data has size 143 bytes.

cryptPushData() failed with error code -31, line 111. Bytes=143

</snip>

Ajay
