I am Frog-Admin's daughter and I am the one in charge of her estate.

As you can see on her website, my mother Frog-Admin was an avid scuba-diver, and she used to take frequent vacations at the best diving spots: Maldives, Red Sea, Tahiti were her favorites. She had been exploring Australia's Great Reef for 2 weeks when she disappeared at sea last week with her two buddies. Surface crew and rescuers were unable to find the corpses, but the air tanks showed large toothprints from Great White sharks. The kind of death she would have liked, MIA as she had told me.

As per my mother's instructions, I will run the remailer and associated services for the next 2 months, and then I will have to shut it down. My mother had given me basic training, but my skills don't go beyond basic Reliable maintenance and using JBN2. I was also given step by step instructions on how to destroy secret keys and other material of interest for users' safety.

Regards
