| There is no easy solution to this problem.  
|

I actually considered something like that. I would have to upgrade my Zaurus 5500 to a new 6000 and my Motorola T720 to a T730. At that point however I could use the cell as a modem and rewrite PGPfone for the zaurus. The problem there is the cost. a New Zaurus runs at least 400 if not more. I guess this will be something that will have to wait until the price of PDA's fast enough for that level of encryption drop in price.

Any other ideas on the subject are greatly appreciated.
