Hi!

I have a system RSA SecurID Authentication with the RSA Authentication Manager Version 6

which supports the AES cryptographic algorithm.

I'm working on the development of a software that produces a token-code based on the AES algorithm.

On the RSA site I have not found anything about it.

Can you give me some advice on it or where I can find a documentation?

Is it true that The rsa has distributed the algorithm of the RSA

SecurID Token? If it's true, can you send me some links?

Thanks a lot.

LuMimmo
