above, one would have to have a clear idea of what is meant by Ingsoc. And in addition, only a person thoroughly grounded in Ingsoc could appreciate the full force of the word bellyfeel, which implied a blind, enthusiastic acceptance difficult to imagine today; or of the word oldthink, which was inextricably mixed up with the idea of wickedness and decadence. But the special function of certain Newspeak words, of which oldthink was one, was not so much to express meanings as to destroy them. These words, necessarily few in number, had had their meanings extended until they contained within themselves whole batteries of words which, as they were sufficiently covered by a single comprehensive term, could now be scrapped and forgotten. The greatest difficulty facing the compilers of the Newspeak Dictionary was not to invent new words, but, having invented them, to make sure what they meant: to make sure, that is to say, what ranges of words they cancelled by their existence.

As we have already seen in the case of the word free, words which had once borne a heretical meaning were sometimes retained for the sake of convenience, but only with the undesirable meanings purged out of them. Countless other words such as honour, justice, morality, internationalism, democracy, science, and religion had simply ceased to exist. A few blanket words covered them, and, in covering them, abolished them. All words grouping themselves round the concepts of liberty and equality, for instance, were contained in the single word crimethink, while all words grouping themselves round the concepts of objectivity and rationalism were contained in the single word oldthink. Greater precision would have been dangerous. What was required
