----- Here comes a large 'reasoned polemic':

This is a U.S.-centric message, but keep reading even if you are not in the U.S.; British, Canadian, Australian and New Zealand citizens are also directly affected.

This message is about ECHELON, which is an unbelievably huge world-wide spying apparatus, including the domestic phone calls of many countries.

United States citizens' phone calls are being monitored in a dragnet fashion not even George Orwell could have imagined.

This was all paid for by U.S. taxpayers.

Built in secret. Not debated.

The CALEA legislation is a shameful takes-us-into-the-abyss domestic spy bill. It is for the FBI to simultaneously monitor HUGE amounts of our phone calls.

And when the judiciary found out about NSA monitoring U.S. citizens' overseas telephone calls without a warrant: they approved the loss of our Fourth Amendment rights.

Giving Presidential Directives the same force of law as the Constitution.
