traffic was occurring. Among others, we had constant small traffic back-and-forth with Military contractor Rockwell.

o Salomon's Official Restricted List being repeatedly transmitted outbound (list of securities Salomon can't purchase without a conflict of interest)

o Unreleased Financing Summaries and unreleased IPO's: SEC violations

o Internal Use Only documents

o Trade confirmations

o JobTalk hits concerning internal budget details by an SOO.

o JobTalk hit of a resume of a risk management person who wanted to "explain how it works" here

o Hundreds of router (security) configurations

o 42,000 lines of OASYS data

o router and bridge passwords

o Hostname/username/password for unmonitored outbound ISDN access from Salomon

o RadioMail: spotted that all the big cheeses who use it have all their highly sensitive email going out over the unprotected Internet, because we were too cheap to buy a transmitter, and so are forwarding all the email over the Internet to RadioMail's transmitter!!!

o The key to one's financial life: Social Security numbers of Salomon retirees transmitted in/out the Internet. Names, birth dates, sex, life insurance amount, date of spouse's birth...

o caught our proprietary infrastructure code running at JP Morgan

***** end excerpt from 'Corruption at Salomon Brothers' *****

Don't try to lower the bastards rarely, coincide them mentally.

Don't try to lower the bastards rarely, coincide them mentally.

So...how have I done, to indicate how powerful keyword
